

## Lab 1

### Problem -1

User Action	System response
1. User types in PIN into main screen	1. System checks validity of PIN and presents options to user on another screen
2. User selects the account types	2. System validates account type and presents user on another screen.
3. User type total balance to withdraw from the account.	3. System validate entered amount from that account and process and trigger update balance mechanism.

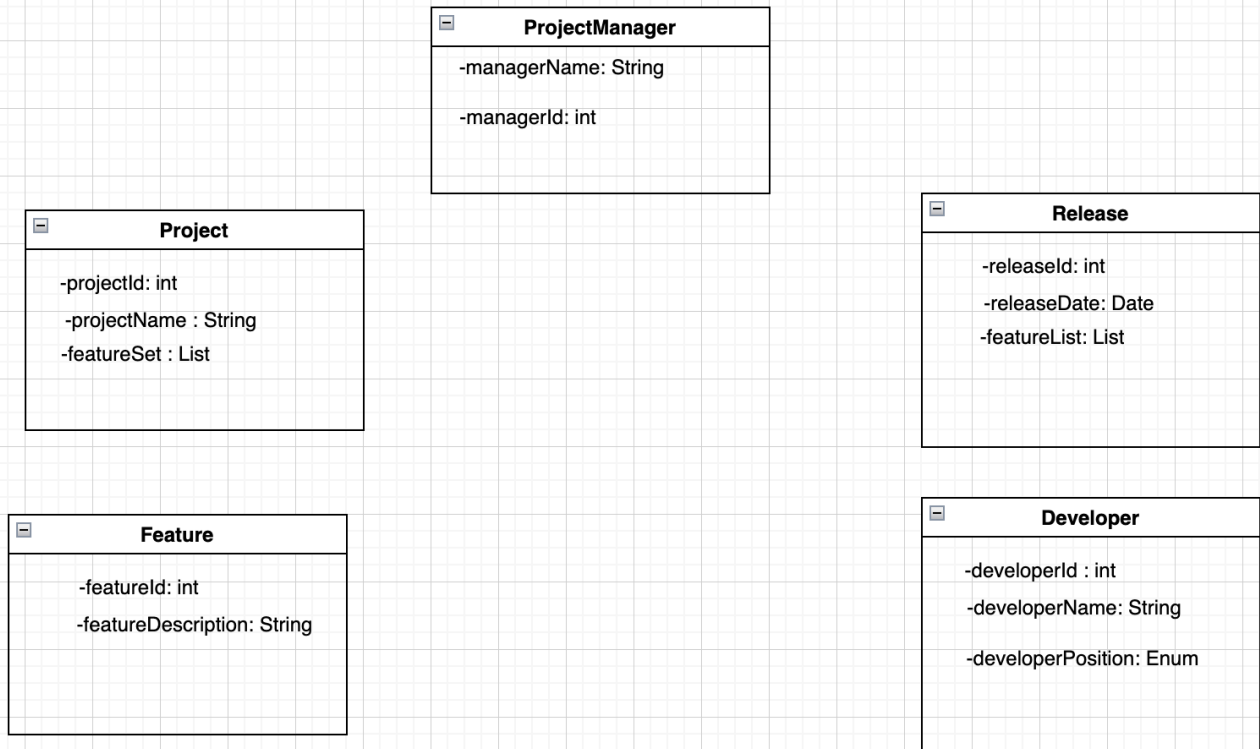

### Problem 2. Use Case Diagram

#### Problem 2

### Problem 3

#### Problem 3: The Project Management Tracking System

### Problem 4

#### Problem 4: Properties Management System
